Community Respiratory Services

Cambridgeshire Community Services NHS Trust: delivering excellence in children and adults’ community health services across Luton
We are a team of community respiratory nurse specialists who work closely with your GP and the hospital team. Our service aims to provide holistic care and support for adults with a diagnosed chronic lung disease.

**Chronic Disease Management**

As part of our role we are here to help you with your lung condition. An appointment can be made at the Luton Treatment Centre or in your own home if you are housebound.

Our service aims to provide a holistic assessment of your needs.

During the visit the nurse will examine you, review your medications including your inhalers and discuss any other concerns you may have. We will provide education and support to help you better manage your condition.

Following the assessment we may suggest changes to your treatment, recommend referrals to secondary care and refer to other services with your consent that may be able to support you and your family.

When a plan of care is agreed and you are stable we will discharge you back to the care of your GP/practice nurse.
We mainly see individuals with the following

- Chronic Obstructive Pulmonary Disease (COPD)
- Asthma
- Bronchiectasis
- Interstitial Lung Disease

You may be referred to the Respiratory Service if you are experiencing the following symptoms

- Increased breathlessness
- Worsening in your secretions
- Functional breathlessness
- Anxiety caused by your condition
- Difficulty using your inhalers
- Recurrent exacerbations
- Ongoing support and monitoring as requested by the referring clinician
Pulmonary Rehabilitation

If you have a long term lung condition you could be referred by your consultant, GP, respiratory nurse or practice nurse for pulmonary rehabilitation.

The course is a 7 week programme with twice weekly sessions provided at different locations throughout Luton.

The 2 hour session combines an hour of exercise which is set according to your abilities. The rest of the time is for education and discussion to help you get the best out of life when living with a lung condition.

Benefits:

- Improve your breathlessness
- Improve your exercise tolerance
- Improve your general health
- Reduce frequency of exacerbations
- Improve your understanding of your condition
- Improve overall quality of life.
Home Oxygen Support

You may have been assessed at the hospital and been prescribed home oxygen.

Our service aims to provide

- A holistic assessment of your needs.
- Monitoring of your condition, including your oxygen levels.
- Education and support regarding oxygen usage.
- Regular review of your medications and inhalers.
- A link between community services and the hospital respiratory team.
- Advice and support when needed and referral to other services if appropriate.
