For free, confidential health advice and information 24 hours a day, 365 days a year please contact NHS 111.
Am I Hydrated?
Urine Colour Chart

This urine colour chart is a simple tool you can use to assess if you are drinking enough fluids throughout the day to stay hydrated.

If your urine matches the colour numbered 1, 2, or 3 you are hydrated.

If your urine matches the colour numbered 4 - 8 you are dehydrated and you need to drink more fluids.

Be Aware! If you are taking single vitamin supplements or a multivitamin supplement, some of the vitamins in the supplement can change the colour of your urine for a few hours, making it bright yellow or discoloured. If you are taking a vitamin supplement, you may need to check your hydration status using another method.

Your nose knows!
While some foods, like asparagus, can cause your urine to smell different, a strong smelling odour can also be a sign of hydration.

Handy hints: - ways to get my child to take their Macrogol - Try adding to the following:
- Breakfast cereal
- Yoghurt
- Ice cubes
- Puddings
- Slushy
- Cupcakes
- Milk shakes
- Smoothies
- Hot chocolate
- Ice lollies
- Custard
- Angel delight
- Mousse
- Frozen yoghurt
- Pancakes
- Shepherds Pie
- Casserole
- Spaghetti Bolognese
- Gravy
- Yorkshire Pudding
- Pasta Sauce
- Any blended foods
Stage 4

Ready to poo in toilet

- Make sure your child is relaxed and happy before you begin.
- Have their favourite book, some bubbles or a small toy handy.
- Make sure the training seat and stool are in place.
- To begin with keep the nappy on but loosen the sides.
- Reward every step.
- After each successful step loosen the nappy further until it would fall off and so that the poo drops into the toilet.
- Remember this may take some time to achieve.
- Remove nappy and allow child to poo in toilet.
- Reward a 😊 and independent child.
- Reward for parents - no more changing nappies 😊

Stage 1

It is vitally important for the child to do a poo regularly - if this only happens in a nappy that is fine, we will work on ways to change this habit. Do not tell the child off or be cross because this can cause constipation.

Let's make sure constipation is not the cause.

- Does your child strain to poo?
- Does your child cry when having a poo?
- Does your child avoid having a poo?
- Does your child have hard and/or large poos?

Yes to any of the above?

Then you may need to begin treatment for constipation. This will be in the form of a Macrogol that will be prescribed by a health professional.

If it is difficult to get your child to take their Macrogol laxatives in a drink then the following tips may help.

- Each sachet should be mixed up with at least 62.5 mls of water.
- Can be stored in a fridge for 24 hours and used as required.
- Can be added in small amounts to foods.
Stage 2

Frightened of the toilet:
Some children do not like the bathroom or toilet - often this is due to sound. It may be the echo, flush of toilet or that the room is small and confined.
Here are some tips that may help. Choose the steps appropriate to your child.

- Make the bathroom and toilet fun.
- Reward every small step.
- Firstly, play, read a story etc. outside the door of the room.
- Open the door and begin to play inside the room.
- Have lots of your child’s favourite things in the room.
- Put a reward chart for entering, spending time in the room.
- When your child is happy to enter the room you are ready for the next step.

Stage 3

Sitting on the toilet:

- Now your child is happy to go into the bathroom or toilet.
- Ensure child is relaxed and happy before you begin.
- Introduce sitting on the toilet - with a nappy and clothes on.
- Make sure the toilet is as comfortable as possible ensure that a child’s training seat is available.
- Use a step for correct positioning - to make it easier to fully empty the bladder and bowel.
- Practise flushing the toilet and washing hands.
- Reward every small step of progress.
- When child is used to the toilet encourage child to poo in nappy while sitting on the toilet.
- Tip poo from nappy into toilet.
- Child is wiped on the toilet.
- Child helps as much as possible.

REWARD EVERY SMALL STEP OF PROGRESS
