

APPENDIX 12 – PLACEMENT FEEDBACK – LSV SERVICE

Witnessing how a vaccine centre is run and how it functions and being a part of the vaccine programme at such a crucial part in the pandemic was really beneficial and something I will take through with me in life (Student Nurse)

In no other placement as a student will you see senior nurses and staff working alongside everyone. It is a fantastic opportunity to see leadership being role modelled (LSV staff member)

I like being around students. We worked well as a team of 2. It was nice to be able to show the student my role (LSV Volunteer)

An 8 week placement was too long – a 2 week placement would be ideal to support different experiences as well as using the training materials used for new staff (Combination of student and staff feedback)

I have had plenty of experience working with students and I know that CCS has a good reputation for supporting students. It was lovely to work with such an engaging and professional student nurse (B5 RHCP)
