

Breastfeeding Support Worker Team
Providing a service to women with a Luton GP to increase breast feeding rates by promoting, supporting and sustaining breast feeding.

We are a dedicated team of Breastfeeding Support Workers with specialist skills in supporting mothers with breastfeeding. We talk about the benefits of breastfeeding and how to make it work for you.

We ring you after your baby is born to offer support at home or on the phone until your baby is 1 month old. Support for breast feeding will be delivered in partnership with the Health Visiting Service staff who can also continue to provide support after the first month if required.

The Breastfeeding Support workers work Monday-Saturday and the team members speak English, Urdu, Pahari, Gujarati, Bengali and Sylheti. Interpreters are used for other languages.

This service is available in addition to the routine support of your Midwife and Health Visitor.

(As a teaching organisation, we often provide practice placements for healthcare students. Students are integral to patient care and practice their skills under the supervision of Cambridgeshire Community Services staff. If you do not wish for them to take part in your treatment provision, please inform a member of staff. This will not affect the quality of the care you receive).

The staff have comments cards available for you to fill in if you wish to comment about the service. If you prefer to comment after the visit please contact the service lead on 0333 405 0087/90.
